Field Service Technician

Involves field trips to our end user installations of our HVAC equipment. Will involve travel primarily in the U.S., Canada, and Mexico. Company provided tools and service vehicle. Some occasional air travel.

The Field Service Technician will be expected to:

1. Be familiar with electrical and piping components and schematics.
2. Verify good HVAC equipment installation practices and standards have been used.
3. Verify equipment operation, including correct gas and electrical component operation.
4. Provide owner training to familiarize the owner with the equipment controls and maintenance requirements.

The position will also involve some factory office time spent assisting with support and troubleshooting of our equipment via phone and email with our customers.

Candidate must be proficient with Microsoft Word and Excel, and employ good spelling, grammar, and written and verbal communication skills.

Please send resume' to personnel@absolutaire.com.
